## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- a) Claim 22 does not particularly point out and distinctly set forth what an "optic" is.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by U. S.

Patent Application Publication US 2002/0176987 A1 to Yadav et al.

Paragraph no. 0097 discloses a solid state reaction between nanoscale powders of a material and at least one of its components by heating the combination to a temperature that completes the solid state reaction. The material may be metallic. Paragraph no. 0109 sets forth that the metals may be f group elements (i. e. rare earth elements). Paragraph no. 0006 seems to suggest that the product is nano-sized, and the product may be used in catalysts, photonic devices, sensors, etc.

***Response to Arguments***

Applicant's arguments submitted with the amendment filed on July 24, 2006 with respect to the pending claims have been considered but are moot in view of the new ground(s) of rejection.

The following references are made of record:

U. S. Patent 6,513,362 B1 disclosing the use of rare earth oxides in sensors (please see col. 4 Ins. 13 and 28);
